

## Fishing Pier

- County Park Road Launch

### OBSERVATIONS:

- Located conveniently adjacent to restrooms, parking, and boat launch
- Anti-slip surface and accessible routes provided
- Seating provided for park users

### RECOMMENDATIONS:

- Consider improved access to water
- Consider expanding boardwalk/dock fishing along bank of reservoir

## Walking | Hiking Trails

- Lakeside

### OBSERVATIONS:

- Existing trails are paved in areas near the Picnic Pavilions and soft material (mulch/turf) along the edge of the reservoir.
- Consider providing accessible alternatives to trails
- Where appropriate

### RECOMMENDATIONS:

- Consider providing shade for parking areas during peak use in summer months
- Where appropriate, implement sustainable stormwater management strategies to reduce runoff into Cross Creek Reservoir
- Provide paths for efficient and safe pedestrian circulation: Reduce vehicle and pedestrian conflicts

## Maintenance

Lynn Portal Area

### OBSERVATIONS:

- +/- 100 Parking Spaces (Boat Trailer and Car Parking)
- Accessible Parking is accommodated
- Efficient access to boat ramp, playground, picnic shelters, and water's edge

### RECOMMENDATIONS:

- Consider providing shade for parking areas during peak use in summer months
- Where appropriate, implement sustainable stormwater management strategies to reduce runoff into Cross Creek Reservoir
- Provide paths for efficient and safe pedestrian circulation: Reduce vehicle and pedestrian conflicts

## Signage and Wayfinding

### OBSERVATIONS:

- Existing signage is simple and direct
- Materials are readily available and damaged signage repaired by park staff and maintenance.
- Signage blends in with foreground and background

### RECOMMENDATIONS:

- Consider a unified aesthetic for all Washington County Parks
- Promote a consistent Family of Signs for all county parks
- Explore color alternatives to increase signage visibility while blending into landscape

## Playground

### OBSERVATIONS:

- Variety of catalogue play equipment
- Moderately accessible
- Close proximity to parking area, restrooms, and picnic pavilions
- Woodland setting
- Hardwood mulch safety surface

### RECOMMENDATIONS:

- Consider addition of shade trees within limits of playground for additional shade. Play surfaces in direct sunlight are prone to causing skin burns
- Evaluate for inclusive play opportunities...play opportunities for all kids
- Evaluate fall zones and safety surfaces
